On March 14, 2020, Guam declared a Public Health Emergency due to COVID-19, which had a profound impact on the island, particularly on high-risk and underserved populations.

This conference will bring together experts to discuss insights and practical strategies for strengthening immunity, supporting COVID-19 recovery, and improving public health for all.

Funded by U. S. Department of Health and Human Services, Centers for Disease Control grant awarded to Guam DPHSS titled "Guam's Initiative to Address COVID-19 Health Disparities" in partnership by a Memorandum of Understanding with the University of Guam.
