MESSAGE FROM THE CHAIRPERSON

The Board of Regents extends its sincere congratulations to the Class of Fanuchânan 2021!

With almost two years of pandemic living, you have persevered through an extraordinary and challenging time. You are all an inspiration for our island and region and a testament to perseverance and adaptability – two traits that will continue to serve you well even past your collegiate career.

As you celebrate this significant accomplishment, I encourage you to take some time to reflect on your academic journey and everyone who was a part of it.

Thank the people who have supported you these last few years. Whether it's your professor, mentor, mom, dad, brother, sister, or friend – they deserve to be celebrated, too. Also, thank yourselves for choosing to invest in your future. The investment you have made here at the University of Guam will pay lifelong dividends.

And as you enter the next phase of your lives, we hope you will remain an active and engaged part of the Triton family and our island of Guam and that you will continue to seek the Triton mission to enlighten, to discover, and to serve.

We look forward to hearing of your many accomplishments to come.

Liza J. Provide
Chairperson, Board of Regents

MESSAGE FROM THE PRESIDENT

It is my honor to recognize our Fanuchânan 2021 graduates on this incredible achievement – one of many to come in your life and career.

As you walk across the stage to receive your diploma, I hope you let this moment serve as a true commencement – a beginning and not an ending. Now is the time to take what you've learned to pursue your dreams and shape the life you want to lead.

Although this is the end of your undergraduate career, this is the start of a new journey – and the possibilities are endless. I encourage each of you to follow your talents, passions, and values to discover your own unique path. I also encourage you to continue to grow your expertise to allow you to contribute in meaningful ways in your local community and the global community.

It is with pride that we recognize your great accomplishment and now welcome you into our family of Triton alumni. Our alumni are dispersed across the globe and throughout Micronesia in impactful roles as government officials, corporate executives and entrepreneurs, leaders in health care, education, science, and more. Your path from this point will become part of UOG's story as well.

From this moment forward, wherever you go in this world and whatever path you take – you will forever be a Triton and part of our community.

Congratulations and BIBA, UOG!

Thomas W. Krise, Ph.D.

ABOUT COMMENCEMENT

Academic Dress and Procession

The history of academic dress dates to the Middle Ages when many scholars were also clerics and wore costume of the monastic orders. In 1321, the University of Cambridge adopted specific styles and color combinations. American colleges and universities desired to adopt a standard code for academic dress for colleges and universities in the United States. The standards continue to be followed by the American Council of Education.

The costumes worn today are all traditional and their colors, trimmings and patterns interpret the degree, the field of learning, and the institution that conferred the degree. The bachelor's gown has long pointed sleeves and is designed to be worn closed; the master's gown has an oblong sleeves open at the wrist. The rear part of its oblong shape is square cut and the front part has an arc cut away. The doctor's gown has bell-shaped sleeves, is faced with velvet and has three bars across the sleeves. The color of the velvet is distinctive of the degree.

The hood tells the story. The type of degree bachelor's, master's, doctor's, is indicated by the width of the velvet edging and the length of the hood, the doctor's hood being the longest and of a fuller shape. The color of the velvet edging denotes the field of learning and the lining denotes the school that conferred the degree.

The color of the tassel, worn on the left side of the mortarboard, indicates the field of study and is gold for those with a doctor's

degree. The colors you will see today in the hoods and gown of our faculty represent the various fields of learning: white, arts, letters, and humanities; drab, business administration; light blue, education; apricot, nursing; dark blue, philosophy; and golden yellow, science.

The academic procession is led by the grand marshal, who is the President of the Faculty Senate. A traditional order to procession is followed: First come the candidates for degrees according to the order in which the degrees are to be conferred; next, members of the faculty led by the faculty marshal, the honorary degree recipient and the other members of the platform party followed by the president of the university. The order is reversed for the recessional.

You will note that some of today's graduates are wearing a gold stole. This stole indicates that the wearer is graduating with academic honors.

The Mace

Historically, the mace was a heavy, spiked club used during the Middle Ages to break armor in battle. Today, the mace is an ornamental staff borne as a symbol of authority before a public official or legislative body. The mace of the University of Guam is made of ifil wood into which are carved ifil leaves. Ifil wood was chosen because of its performance, strength and value, all of which reflect the major characteristics of the University of Guam. The mace, designed by Forrest G. Rogers, was carved and donated to the University of Guam by the Department of Corrections.

COMMENCEMENT ADDRESS

DIOSDADO P. "DADO" BANATAO

Technology Innovator and Entrepreneur

Diosdado P. "Dado" Banatao is a Filipino engineer, self-made entrepreneur, and venture capitalist who has come to be known as a visionary within Silicon Valley, the global center for high-tech innovations.

Banatao is credited with developing several semiconductor technologies, including the first graphics accelerator chip and the local bus concept that continue to be foundation technologies in every personal computer today.

He co-founded three technology startups: Mostron, a manufacturing company for motherboards; Chips & Technologies, which developed the system logic chipset for IBM computers and was eventually bought by Intel; and S3 Inc., which became a publicly traded company and was the leader of the graphic-chip market in the 1990s.

DIOSDADO P. "DADO" BANATAO
Technology Innovator
and Entrepreneur

With experience as an entrepreneur and a unique perspective in technology investments, Banatao later launched his own multimillion-dollar venture capital firm, Tallwood Venture Capital. He invested in complex semiconductor technology solutions, including the first GPS chipset and the first noise-cancelling chip for mobile phones, among many others.

Banatao is known for his rags to riches story – coming from Cagayan Valley in the Philippines, where he walked barefoot to elementary school. His father, Salvador, was a rice farmer who worked overseas in Guam when Dado was 9 years old, and his mother, Rosita, was a homemaker.

With an aptitude for academics early on, he was able to attend a private Catholic school for his secondary education that set the course for his career. He continued on to Mapúa Institute of Technology, where he earned a bachelor's in electric engineering, graduating cum laude. While training as a pilot for Philippine Airlines, his childhood dream, he became aware of job openings for design engineers at Boeing, and his path shifted course. He came to the United States in 1968 to work for Boeing in Seattle. He then enrolled full-time at Stanford University and earned his master's in electrical engineering and computer science in 1972.

His first design job was with National Semiconductor. His skills continued to grow while working for Commodore Business Machines, Intersil Inc., Synertec Inc., and Seeq Inc.

Today, he holds numerous awards for his contributions to technological innovations, but also for his philanthropic contributions both in the United States and in the Philippines. He was named "Benevolent Disruptor" on the cover of Forbes Philippines magazine.

Throughout his successes, he has not forgotten his humble beginnings and hopes his story can be an inspiration for youth today.

THE NATIONAL ANTHEM

Lyrics by Francis Scott Key

Oh! Say, can you see, by the dawn's early light,
What so proudly we hailed at the twilight's last gleaming?
Whose broad stripes and bright stars, thro' the perilous fight,
O're the ramparts we watched were so gallantly streaming.
And the rockets' red glare, the bombs bursting in air,
Gave proof thro' the night that our flag was still there.
Oh! Say does that star-spangled banner yet wave
O're the land of the free and the home of the brave?

THE GUAM HYMN / FANOHGE CHAMORU

Ramon Manalisay Sablan, M.D. (1934)

Translated to CHamoru by Lagrimas Untalan

Fanohge CHamoru put it tano'-ta
Kanta I matuna-na gi todo I lugat.
Para I honra, para I gloriha
Abiba I isla, sin parat.
Para I honra, para I gloriha
Abiba I isla, sin parat.

U todo I tiempo I pas para hita
Yan ginen I langet na bendesion.
Kontra I piligru, na'fansafu ham
Yu'os protehi I isla Guåhan.
Kontra I piligru, na'fansafu ham
Yu'os protehi I isla Guåhan.

UNIVERSITY ALMA MATER

Music by R. Mannoni

On the shore of the Western Pacific
Stands our Alma Mater true.
We'll long retain the memories
Of the days we spent with you.

In the warmth of the island magic,
We will return some day.
Join in and sing a song of praise.

Hail, oh hail.
Hail, oh hail.
Our University.
