

Environmental Position (Entry level) for Environmental Scientist/Consultant

Unitek Environmental Guam is a full-service environmental company that provides great opportunities for a rewarding and challenging career. Enjoy competitive salary, great benefits, and a wide variety of projects. Excellent opportunities for training and career advancement.

Entry Level Qualifications and Responsibilities: Must have a minimum of a B.S. degree in science related discipline or other related environmental discipline. Experience in the environmental industry is preferred but not required and will train the right candidate. This job is approximately 50% field work and 50% office work. Good communication skills are a must and should exhibit strong technical and administrative skills. This position requires a positive attitude, and a strong desire to learn. The set of challenges will include learning and performing Phase I Environmental Site Assessments, Environmental Contingency Planning, Environmental Remediation, Hazardous Waste Management, Phase II Site Assessments, sampling various media (groundwater, soil, surface water, air, etc.), logging soil borings, compiling field records, documenting site activities, and directing subcontractors. Office tasks would include: data analysis, data interpretation and manipulation, report writing, and coordination of logistics for field efforts. Should have organizational skills with the ability to manage and prioritize several assignments at one time, while ensuring delivery within specific deadlines and budgets. Email resume to: UnitekIm@ite.net.
